

Aeon Balanced Prescient Fund

Minimum Disclosure Document:

Investment Philosophy

Aeon Investment Management's equity investment style is that of Growth At a Reasonable Price (GARP) and modelling Implied vs. Sustainable Growth. We also utilise our in-house Currency Model for foreign asset allocation and the Fear & Greed Index for appropriate protective structure overlays. Aeon Balanced Prescient Fund's investment strategy encompasses active asset allocation and active management of underlying equity and fixed income assets. The fund has five diversified sources of alpha (Active Equity, Core Enhanced Equity, Foreign Equity, Diversified Income, Derivative Protective Overlay).

Investment Objective

The Aeon Balanced Prescient Fund seeks to achieve:

- Inflation beating returns by investing in the full spectrum of domestic and foreign equity and fixed income markets
- Provide investors with stable income and modest capital appreciation in the long run
- Manage risk through disciplined portfolio construction
- Employ low cost trading techniques

Fund Details

Benchmark: STEFI Index + 3% p.a.
Inception date: 1 November 2012
Fund size: R 74.22 million
Risk profile: Moderate

- These portfolios generally hold more equity exposure than low risk portfolios but less than high risk portfolios.
- In turn the expected volatility is higher than low risk portfolios, but less than high risk portfolios.
- The probability of losses are higher than that of the low risk portfolios, but less than high risk portfolio.
- Expected potential long term investment returns could therefore be lower than high risk portfolios due to lower equity exposure, but higher than low risk portfolios.

Investment horizon: Five years plus
Fund Classification: South African—Multi Asset—Medium Equity

Performance Review & Market Commentary

The Aeon Balanced Prescient Fund outperformed its benchmark of cash money market rates plus 3% by 52 bps for the first quarter of 2017 and is outperforming its benchmark by 111 bps per annum since inception.

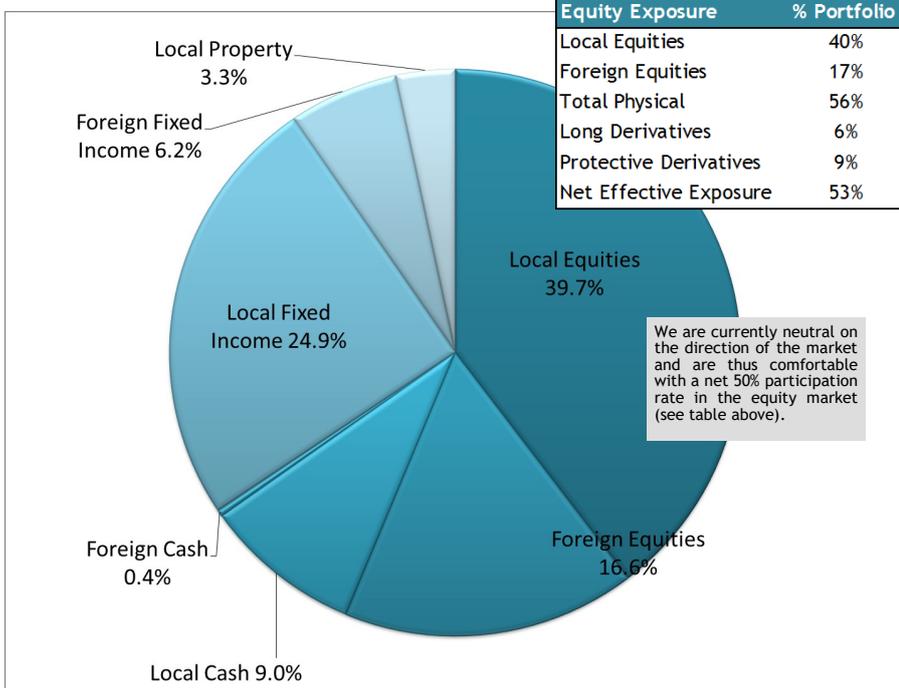

The strongest sector for first quarter of 2017 was the Consumer Services Sector with many retail counters showing continuous gains after the sector reached its lows in November 2016 as there is renewed optimism about increased levels of consumer spending. The Banking Sector was the weakest due to the sentiment around the local cabinet reshuffle and its implications on inflation and higher funding costs.

Globally, the two areas of focus are the rate of hikes in the US by the FOMC and the various Donald Trump news flows. January and February saw the S&P500 continuously making new highs due to the expectations of business-friendly policies such as a decrease in taxes and loosening of regulations, and expected increased infrastructure spending from the Trump administration. This was somewhat tempered in March as it seems he may be unable to deliver some of these promises highlighted by the fact he could not convince the Republican party to remove the previous administration's Affordable Care Act (Obamacare). This caused markets worldwide to take a breather, the Dollar to weaken, and the expectations of future US growth to decrease.

Locally, there is only one headline that requires attention. It started with rumours of a cabinet reshuffle, was aggravated by the surprise recall of finance minister, Pravin Gordhan, from an international roadshow, flared up post an emergency press conference from the SA Communist Party, and finally climaxed with Jacob Zuma's removal of nearly a third of his ministers, including Minister Gordhan and deputy Finance Minister Mcebisi Jonas. Former Minister of Home Affairs, Malusi Gigaba, has been appointed as the new Minister of Finance. As a result, the Rand has weakened considerably whilst financial stocks have lost billions in market cap due to perceptions of increased inflation and increased chances of increasing interest rate funding costs. The ratings agencies have already downgraded South Africa. This will have the effect of increasing borrowing costs.

The cautious and prudent view would be that high volatility will remain, with more risks to the downside for equities and bonds. Gold and quality gold companies in a well-diversified portfolio may provide "insurance" in a more unpredictable environment.

The Management Company and Trustee are registered and approved under the Collective Investment Schemes Control Act (No.45 of 2002). Prescient is a member of the Association for Savings and Investments SA.

This document is for information purposes only and does not constitute or form part of any offer to issue or sell or any solicitation of any offer to subscribe for or purchase any particular investments. Opinions expressed in this document may be changed without notice at any time after publication. We therefore disclaim any liability for any loss, liability, damage (whether direct or consequential) or expense of any nature whatsoever which may be suffered as a result of or which may be attributable directly or indirectly to the use of or reliance upon the information.

Performance Fee: The Fund charges a base and performance fee. Performance fees are payable on outperformance of the benchmark using a participation rate of 10%. A permanent high watermark is applied, which ensure that performance fees will only be charged on new performance. There is no cap on the performance fee.

Third Parties

Management and administration:

Prescient Management Company (RF) (Pty) Ltd. This portfolio operates as a white label fund under the Prescient Unit Trust Scheme, which is governed by the Collective Investment Schemes Control Act.

Collective Investment Schemes in Securities (CIS) should be considered as medium to long-term investments. The value may go up as well as down and past performance is not necessarily a guide to future performance. CIS's are traded at the ruling price and can engage in scrip lending and borrowing. The collective investment scheme may borrow up to 10% of the market value of the portfolio to bridge insufficient liquidity. A schedule of fees, charges and maximum commissions is available on request from the Manager. There is no guarantee in respect of capital or returns in a portfolio. A CIS may be closed to new investors in order for it to be managed more efficiently in accordance with its mandate. CIS prices are calculated on a net asset basis, which is the total value of all the assets in the portfolio including any income accruals and less any permissible deductions (brokerage, STT, VAT, auditor's fees, bank charges, trustee and custodian fees and the annual management fee) from the portfolio divided by the number of participatory interests (units) in issue. Forward pricing is used. The Fund's Total Expense Ratio (TER) reflects the percentage of the average Net Asset Value (NAV) of the portfolio that was incurred as charges, levies and fees related to the management of the portfolio. A higher TER does not necessarily imply a poor return, nor does a low TER imply a good return. The current TER cannot be regarded as an indication of future TER's. During the phase in period TER's do not include information gathered over a full year. Transaction Costs (TC) is the percentage of the value of the Fund incurred as costs relating to the buying and selling of the Fund's underlying assets. Transaction costs are a necessary cost in administering the Fund and impacts Fund returns. It should not be considered in isolation as returns may be impacted by many other factors over time including market returns, the type of Fund, investment decisions of the investment manager and the TER.

Where a current yield has been included for Funds that derive its income primarily from interest bearing income, the yield is a weighted average yield of all underlying interest bearing instruments as at the last day of the month. This yield is subject to change as market rates and underlying investments change.

The Manager retains full legal responsibility for any third-party-named portfolio. Where foreign securities are included in a portfolio there may be potential constraints on liquidity and the repatriation of funds, macroeconomic risks, political risks, foreign exchange risks, tax risks, settlement risks; and potential limitations on the availability of market information. The investor acknowledges the inherent risk associated with the selected investments and that there are no guarantees. Please note that all documents, notifications of deposit, investment, redemption and switch applications must be received by Prescient by or before 13:00 (SA), to be transacted at the net asset value price for that day. Where all required documentation is not received before the stated cut off time Prescient shall not be obliged to transact at the net asset value price as agreed to. Money market Funds are priced at 1pm all other Funds are priced at either 3pm or 5pm depending on the nature of the Fund. Prices are published daily and are available on the Prescient website.

Performance has been calculated using net NAV to NAV numbers with income reinvested. The performance for each period shown reflects the return for investors who have been fully invested for that period. Individual investor performance may differ as a result of initial fees, the actual investment date, the date of reinvestments and dividend withholding tax. Full performance calculations are available from the manager on request.

For any additional information such as fund prices, brochures and application forms please go to www.aeonim.co.za

Glossary Summary

Annualised performance: Annualised performance show longer term performance rescaled to a 1 year period. Annualised performance is the average return per year over the period. Actual annual figures are available to the investor on request.

Highest & Lowest return: The highest and lowest returns for any 1 year over the period since inception have been shown.

NAV: The net asset value represents the assets of a Fund less its liabilities.

Alpha: Denoted the outperformance of the fund over the benchmark.

Standard Deviation: The deviation of the return stream relative to its own average.

Max Drawdown: The maximum peak to trough loss suffered by the Fund since inception.

Max Gain: Largest increase in any single month

% Positive Month: The percentage of months since inception where the Fund has delivered positive return.
