

Aeon Enhanced Equity Prescient Fund

Minimum Disclosure Document:

Fund Description

Aeon Investment Management's Enhanced Equity Prescient Fund strategy uses selected fundamental and technical factors for security selection to manage a portfolio designed to outperform the SWIX benchmark. The portfolio is designed to add value in a risk managed framework.

Investors should consider the Aeon Enhanced Equity Prescient Fund if they have a long term investment horizon (5-years or longer), and are looking for capital gains at low cost.

Investment Objective

Aeon's Enhanced Equity Prescient Fund strategy seeks to:

- Achieve consistent outperformance of the benchmark
- Generate excess returns that are positive, stable, explainable and replicable
- Manage risk through disciplined portfolio construction

Performance Review & Market Commentary

The Aeon Enhanced Equity Prescient Fund outperformed its benchmark by 36 bps for the first quarter of 2017 on a gross return basis and is in line with its benchmark since inception.

Overweight positions in British American Tobacco and Mondi were the main positive contributors to return for the quarter. Overweight positions in JSE and Spar were the main detractors.

The benchmark equity index was up 3.30% for the first quarter of 2017.

The strongest sector for first quarter of 2017 was the Consumer Services Sector with many retail counters showing continuous gains after the sector reached its lows in November 2016 as there is renewed optimism about increased levels of consumer spending. The Banking Sector was the weakest due to the sentiment around the local cabinet reshuffle and its implications on inflation and higher funding costs.

Globally, the two areas of focus are the rate of hikes in the US by the FOMC and the various Donald Trump news flows. January and February saw the S&P500 continuously making new highs due to the expectations of business-friendly policies such as a decrease in taxes and loosening of regulations, and expected increased infrastructure spending from the Trump administration. This was somewhat tempered in March as it seems he may be unable to deliver some of these promises highlighted by the fact he could not convince the Republican party to remove the previous administration's Affordable Care Act (Obamacare). This caused markets worldwide to take a breather, the Dollar to weaken, and the expectations of future US growth to decrease.

Locally, there is only one headline that requires attention. It started with rumours of a cabinet reshuffle, was aggravated by the surprise recall of finance minister, Pravin Gordhan, from an international roadshow, flared up post an emergency press conference from the SA Communist Party, and finally climaxed with Jacob Zuma's removal of nearly a third of his ministers, including Minister Gordhan and deputy Finance Minister Mcebisi Jonas. Former Minister of Home Affairs, Malusi Gigaba, has been appointed as the new Minister of Finance. As a result, the Rand has weakened considerably whilst financial stocks have lost billions in market cap due to perceptions of increased inflation and increased chances of increasing interest rate funding costs. The ratings agencies have already downgraded South Africa. This will have the effect of increasing borrowing costs.

The cautious and prudent view would be that high volatility will remain, with more risks to the downside for equities and bonds. Gold and quality gold companies in a well-diversified portfolio may provide "insurance" in a more unpredictable environment.

Fund Composition for the 1st Quarter 2017

Third Parties

Management and administration:

Prescient Management Company (RF) (Pty) Ltd. This portfolio operates as a white label fund under the Prescient Unit Trust Scheme, which is governed by the Collective Investment Schemes Control Act.

Collective Investment Schemes in Securities (CIS) should be considered as medium to long-term investments. The value may go up as well as down and past performance is not necessarily a guide to future performance. CIS's are traded at the ruling price and can engage in scrip lending and borrowing. The collective investment scheme may borrow up to 10% of the market value of the portfolio to bridge insufficient liquidity. A schedule of fees, charges and maximum commissions is available on request from the Manager. There is no guarantee in respect of capital or returns in a portfolio. A CIS may be closed to new investors in order for it to be managed more efficiently in accordance with its mandate. CIS prices are calculated on a net asset basis, which is the total value of all the assets in the portfolio including any income accruals and less any permissible deductions (brokerage, STT, VAT, auditor's fees, bank charges, trustee and custodian fees and the annual management fee) from the portfolio divided by the number of participatory interests (units) in issue. Forward pricing is used. The Fund's Total Expense Ratio (TER) reflects the percentage of the average Net Asset Value (NAV) of the portfolio that was incurred as charges, levies and fees related to the management of the portfolio. A higher TER does not necessarily imply a poor return, nor does a low TER imply a good return. The current TER cannot be regarded as an indication of future TER's. During the phase in period TER's do not include information gathered over a full year. Transaction Costs (TC) is the percentage of the value of the Fund incurred as costs relating to the buying and selling of the Fund's underlying assets. Transaction costs are a necessary cost in administering the Fund and impacts Fund returns. It should not be considered in isolation as returns may be impacted by many other factors over time including market returns, the type of Fund, investment decisions of the investment manager and the TER.

Where a current yield has been included for Funds that derive its income primarily from interest bearing income, the yield is a weighted average yield of all underlying interest bearing instruments as at the last day of the month. This yield is subject to change as market rates and underlying investments change.

The Manager retains full legal responsibility for any third-party-named portfolio. Where foreign securities are included in a portfolio there may be potential constraints on liquidity and the repatriation of funds, macroeconomic risks, political risks, foreign exchange risks, tax risks, settlement risks; and potential limitations on the availability of market information. The investor acknowledges the inherent risk associated with the selected investments and that there are no guarantees. Please note that all documents, notifications of deposit, investment, redemption and switch applications must be received by Prescient by or before 13:00 (SA), to be transacted at the net asset value price for that day. Where all required documentation is not received before the stated cut off time Prescient shall not be obliged to transact at the net asset value price as agreed to. Money market Funds are priced at 1pm all other Funds are priced at either 3pm or 5pm depending on the nature of the Fund. Prices are published daily and are available on the Prescient website.

Performance has been calculated using net NAV to NAV numbers with income reinvested. The performance for each period shown reflects the return for investors who have been fully invested for that period. Individual investor performance may differ as a result of initial fees, the actual investment date, the date of reinvestments and dividend withholding tax. Full performance calculations are available from the manager on request.

For any additional information such as fund prices, brochures and application forms please go to www.aeonim.co.za
